## Abstract

The main goal of this white paper is to explain the Sebeum platform and our investment opportunities for our investors. Why did we choose this name? We think that Sebeum is an amazing name that is full of opportunities for all of us, there was an investment house in 1967 that was offering shares for their investors, with every share that they bought, they were eligible for a 0.01% profit of the company forever, and this is how Sebeum has re-borned in form of a cryptocurrency. This new token is looking for making everybody's life easier, we are offering too many opportunities for our investors, and we want to take care of them, Sebeum is looking for putting all the efforts to make this campaign a successful one. The Sebeum Token (SBM) is the coin that will represent our revenue's pool, those tokens will be used as "shares" and they will be exchangeables on any exchange around the internet, you will be able to trade SBM for cryptos, or SBM for fiat money or vice versa. As the project gets released into the open market we are looking to add and enhance more features among the Sebeum system to enhance the accessibility of the crypto markets.

## Introduction

The popularity of cryptocurrencies is growing at an extreme rate, and everybody loves them, they make everybody's life easier, right? And this is why we want to take advantage of this situation and try to make things more easier than now. Sebeum is a very good society between the both founders of this innovative idea. They are the owner of several physical investments/goods in the city of Buenos Aires, Argentina. And they want to invest all their money into this company, to help everybody to grow their capital, and help other people who wants to be helped. Everybody wanted to buy Shares of a company that was growing so fast, but it is so hard to realize, when you want to buy a Share of any well known company you needed to prove your ID, source of funds, and so more things. That is why we wanted to be the first company that offers their shares "tokenized" and everybody can buy them in any exchange on the internet.

## Sebeum as a Company

Just like we said, we are going to be the first company that is offering their shares in a "tokenized way". Sebeum is a society between the both funders of this project, both of them are one of the bests businessman that are living on Buenos Aires, Argentina. They have too many physical projects on their country, but now they want to invest the profits from two projects into this new "tokenized idea" that they are going to develop.

## Our Physical Revenues

They have a very good source of money, actually, they have a flat with 12 rooms in the city of La Plata, Buenos Aires, Argentina. Which everyone makes a monthly profit of \$550-\$650 United States dollars every month. Also they have a Fund in a bank who is called "LEBACs" of \$8.600.000 Millions of Argentine Pesos (actually \$450k dollars approximately) And it gives a 27% return every year, around 0,0225% monthly. This makes a pure profit of \$18.000 - \$22.000 every month, and they are going to invest it in Sebeum. If it is not enough, then they are going to sell those investments and put all the money on the company.

## SBM Token

We are trying to assure investors and supporting members that their investment will have a huge return as the Sebeum system grows. Because of this all SBM tokens purchase during the presale and ICO will have a return of 1 SBM to \$0.04 at the Market Entry Price. We are offering a 170% discount on the first stage of our PRE-ICO. And we are going to make a special offer with a 400% return for those who want to contribute in our project before the PRE-ICO. They will be buying our tokens at \$0,0082 each one, and the market entry price is \$0,04. Our total cap for the project is 106 million SBM tokens. Sebeum is based on Waves technology.

## Plans for making the price higher

Once that the ICO is finished, it will take one more day for the token to be listed on Novaexchange. At the moment that the ICO is finished, SBM will be tradeable on Waves Exchange on their own platform. So there is no way that you could not exchange your tokens for any other cryptocurrency/fiat money. By this way, we will make sure that the price is going to go up time by time, and we, as a company, are going to buy thousands/millions of tokens every year, so there is no way that the token will not be going up. We are going to raise our fund, and there are only going to be good news for us, and the price is obviously going to go up. We can expect a \$0,60 - \$1 by the end of the year.

## Dividends Information

When you buy SBM tokens, you will be automatically eligible for our company Dividends, this a chart that will let you know how much you are going to earn. You will be eligible to earn 1% of your total tokens in BTC form. With Sebeum you are not only going to be able to earn money because of the price volatility, you will earn extra profit from our company Revenues.

## HOW MUCH IS MY PROFIT?

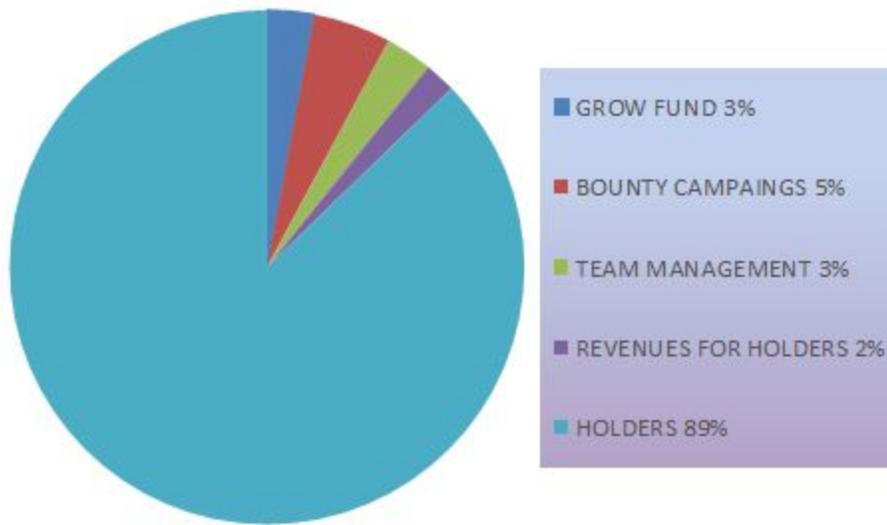

with Sebeum you are going to earn a 1% montly return of your total tokens in BTC

12% ANUALLY	IN BTC	
SEBEUM	Montly Revenue	Yearly Revenue
10000	0,00100	0,0120
100000	0,01000	0,1200
1000000	0,10000	1,2000
10000000	1,00000	12,0000

You are going to earn 1% of your total tokens every month, you will be able to withdraw the dividends every three months, so you can not make any movement with your SBM tokens, otherwise you are going to be eligible for the next round of distribution of dividends. We are going to release a website for all of you to be able to know how much are you going to get with your tokens, very soon.

## Trust and Transparency

You are always going to be able to check our Wallets to be sure that we are not going to make any strange movement. Sebeum is looking for a middle-short term investment, and we want to take care that there is not going to be any strange movement on the wallets of our own team. There are going to be wallets that would be for holding the Funds of the distribution, so anyone can check those wallets to see if there is any weird movement on our company. We are going to use 3% of sold tokens for growing our fund, 5% is going to be for paying the Bounty campaigns and all the advertisers that are making us publicity, 3% is going for the founders and managers of this project. 2% is a reserved pool for paying dividends in case that the project does not have enough money for paying them in any moment, and 87% of total coins sold are going to be for the market capitalization.

## Timelines

We are going to release our first offer to contribute on this Idea immediately after the ANN thread is published, and this offer will remain active until we reach a total contribution of 20ETH or the equivalent in BTC. A total of 640000 tokens will be issued in this offer. After this, the next stage for buying tokens will be on the first stage of the PRE-ICO, there are going to be 5million of tokens in distribution, and anyone can buy them. The next stage is the PRE-ICO second stage, and there are going to be 6 millions more for a massive sell. And we are going to make our "ICO" sale on October 25<sup>th</sup>, and there will be 14 millions of SBM for sell. You will be able to sell your SBM coins at anytime on your Waves Dex.

### OUR TIMELINE

## Roadmap

First of all, after the ICO is over, we are going to grow our fund to have a bigger income in the company. And all the funds made from our projects, will be used for buying tokens and paying for the Dividends of our investors. As we are a ICO based on Waves Technologies, you are able to purchase SBM tokens in the Waves Dex and instantly sell them at the moment you want, so you will be able to dump your coins at anytime. We are going to be listed on Novaexchange as soon as possible after the ICO, as we have a free spot in there waiting for us. We are going to raise our fund in our local bank to the total sum of \$18.000.000 Millions of Argentine Pesos, we are going to make a revenue of forty thousand dollars every month with this amount, and with our extra revenue from the flats we are making about fifty thousand dollars every month, and that is our desired monthly profit to be able to pay our dividends and buy tokens from the exchangers, so we can keep the volume active.

## Opportunities for our investors

We only care about our investors, and that is why we want to make you satisfied, that is why we are offering a 400% return over your investment if you contribute to us at the Special Offer, for 32000 SBM every one ETH. At our Pre-ico1, we are offering a 185% return once that the ICO is over, and you will be immediately able to exchange them for fiat/btc/eth. At the Second stage of our Pre-ico, you are going to make a 160% once that the ico is over. And if you contribute in our ICO stage, you are going to make a profit of 150% at the end of this one. So as you can see, you are going to make an incredible profit if you invest on our early stages of our project. And that is not all! You are going to be eligible to earn 12% fixed every year of your total tokens in BTC.

## Sebeum as a Middle-Long term option

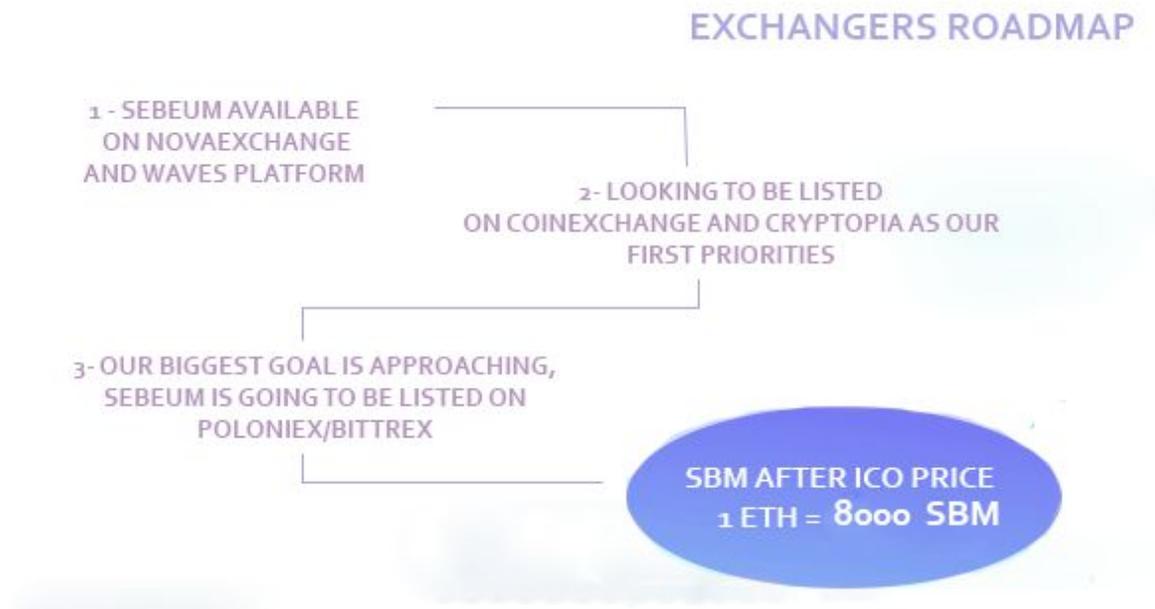

We as a company, see this project as a Middle-Long term investment, because we think that investing In our early stages will make you sure that you will make an amazing profit before the end of this year. You are probably going to make more than 2000% or even 1000% when the coin gets to \$0,60 - \$1 each Sebeum, and we think that this is going to happen before December-January.

## Sebeum Storage and Wallets

SBM tokens are Waves-based, so that means that you can hold them on our own Waves platform, that is why you can easily trade them on their own exchange. SBM tokens can not even be more simple to use. We are looking for developing our own wallet in a near future, so stay stunned, we have a lot of features to develop in the upcoming months.

## Sebeum on Exchanges

Sebeum is going to be Exchangeable on Waves Platform after the ICO, and we are looking to list it on Novaexchange a few days after the ICO is over, so you will always be able to sell your tokens or trade them for any other crypto. We are looking to list it on Poloniex by the end of the year, and bittrex and cryptopia on the first two months of 2018.

## Conclusion

Sebeum has a giant community in Argentina, because this is the First ICO from that country, and we have a great community in almost all the forums/groups In there. We think that we are one of the first companies that thinks more in their investors than in ourselves, that is why we ask you to be part of this project, because we like you. We are going to develop a lot of projects in the next future, the founders of this idea are those kind of people that never give up, and they always want to have more projects, and take all ideas to the next level, so if you wanna have an easier life, then be part of this project, we are giving a lot of opportunities to you.
